PROFILE

Frontend Engineer with 4+ years of delivering high-performance, accessible web applications using React, Next.js, and TypeScript. Experience collaborating with distributed (remote-first) teams across multiple time zones, working closely with UX designers, visual designers, and backend engineers. I love web standards, open source, and building fast, inclusive, and maintainable interfaces at scale.

TECHNICAL SKILLS

Frontend: React, Next.js, Vue, TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS
Styling & UI: Tailwind CSS, Styled Components, Material UI, Ant Design, Storybook, Design Systems
State & Data: Redux, Zustand, React Query, WebSockets
Backend & Tooling: Node.js, Express.js, Nest.js, Firebase, PostgreSQL, MySQL, Docker, Webpack, Vite
Standards & Practices: WCAG 2.1 Accessibility, Core Web Vitals, Responsive Design, SEO, Git/GitHub, CI/CD, Agile
Platform: Linux (Ubuntu/Debian), macOS, Docker

PROFESSIONAL EXPERIENCE

Autochek Africa · July 2025 – Present

Frontend Engineer

- Implemented ISR across non-dynamic pages within one week to fix slow page loads. Reduced load times from 2+ seconds to under 50ms and achieved a 97% performance improvement, directly strengthening Core Web Vitals scores across production.
- Added concurrent data fetching and deferred external script execution to address high Total Blocking Time, cutting TBT to under 300 ms and improving responsiveness for users on low-powered devices.
- Applied dimension querying and lazy loading to all image assets, achieving a ~50% reduction in image transfer size and faster page load speeds across the platform.
- Built a PWA with service worker versioning and intelligent caching to keep the platform reliable in poor network environments, enabling offline access for users across African markets where connectivity is inconsistent.

OpenDesk · Mar 2023 – Jun 2025

Frontend Developer

- Built a modular internal ERP tool in React and TypeScript with a shared component library, increasing feature delivery speed by 20% across teams.
- Introduced code review standards and unit testing frameworks that reduced production bug reports by 35%.
- Worked closely with stakeholders to turn complex enterprise requirements into intuitive interfaces, achieving a 75% positive feedback rating from internal users.
- Coordinated cross-functional delivery against fixed milestones using a structured handoff process, hitting 80% on-time delivery across major project phases.

Vaulthill · Dec 2023 – May 2025

Full-stack Developer

- Re-architected application state management to resolve persistent bug complexity, cutting average bug resolution time by 20%.
- Worked with Product and Design over a three-month revamp that drove a 15% increase in core application usage.

- Shipped a real-time WebSocket layer for AI-driven service interactions, improving user engagement by 10% within the first month.
- Maintained a CI/CD pipeline with a 98.5% deployment success rate throughout the engagement.

Spur SMB · Jul 2023 – Nov 2023

Software Engineer (Contract)

- Audited and fixed UI components across all critical flows to meet WCAG 2.1 AA, expanding the addressable user base and improving inclusivity for users with disabilities.
- Profiled bundle size, lazy-loaded routes, and compressed assets, cutting page load times by 15% and improving user retention.
- Integrated a third-party AI support system that automated 40% of tier-1 customer inquiries and enabled more personalised self-service.
- Helped architect and scale platform infrastructure ahead of a growth campaign that supported 200% DAU growth over four months without degradation.

Ajeo · Feb 2022 – Mar 2023

Frontend Engineer

- Centralized application state with Redux, reducing UI inconsistency bug reports by 25%.
- Streamlined the CI/CD pipeline, cutting deployment time by 10% and enabling more frequent, lower-risk releases.
- Implemented error tracking and load balancing improvements that maintained 99.9% uptime during peak e-commerce events.

PROJECTS

Hancaly · Tredbase · Bash · Alliance Chemicals

EDUCATION & CERTIFICATIONS

Bachelor of Science, Computer Science · Babcock University · 2017 – 2021

BCS Certificate in IT · 2024
